Paul, your comments on #48 incoude "the CIA had gotten and given the WC some original carbons of papers ostensibly prepared for scholarly journals. (I would have to check my taped notes for confirmation and details.)" This, in all the detail possible, would interest Jim and me very much at this moment. Plus all the identification needed to get from the Archives whatever you saw and didn't get. As you know from earlier notes, there is a fair amount of this and we are both interested for special, non-WC reasons. If you can let one of us have a copy of your notes it could be quite helpful. Thanks, HW 1/2/74
